| Supervising Architect | | | |

| Description to be checked | Accept | Reject | Remarks |
|--|--------|--------|---------|
| Name, Date and Registration No of drawing | | | |
| PRE-CHECKS | | | |
| Check for squareness and plumbness | | | |
| Ensure the dry-wall contractor allows a+-10mm gap between stud and top track | | | |
| Check that the stud spacing varies between 400mm and 600mm | | | |
| Ensure that profiles have been specified as side, top and floor channels. Top hat sections or aluminium side channels are ideal solutions but are an extra cost to the wall therefore the detailed drawings must have included these details | | | |
| Ensure there is a continuous expansion joints through the wall system | | | |
| NO PARTITION WALLS BUILD OVER EXPANDION JOINTS | | | |
| Check that there is allowance for movement joints in board | | | |
| check that all tracks and studs are properly fixed and spaced | | | |
| check all walls are level or plumb | | | |

| | | | |
|---|--|--|--|
| check all skirting and cornice line are straight | | | |
| check that all door frames and openings are properly fixed | | | |
| check for tember inserts to take door frames or heaby objects | | | |
| chck all services and installation is installed in correct position and securely fixed before closing walls | | | |
| check wall boards are installed with a 10mm clearance from the door | | | |
| Ensure partition boards staggerd to avoid long horizontal joints | | | |
| Ensure sure that boards are fixed at 220mm centers | | | |
| check that wall board surfaces have not been damaged and that joints are correctly butted and staggered | | | |
| check skimming procedures and smoothness of surface are applied | | | |

| | GENERAL REMARKS |
